Dear Sirs:

I am interested in getting some information about your research grant applications. I have a copy of an application dated January 1985 which states that deadlines for application are November 30 and May 31.

I would appreciate knowing whether your grant program is still in effect and if so whether the deadlines are the same. I would also like to get an idea of how many new proposals you fund each year and whether you give any priority to new investigators.

If your grant program is still in effect I would appreciate receiving an updated application kit in time to apply for the November deadline.

Thank you very much for your help.

Sincerely,

Peter R. Shank, Ph.D.
Associate Professor of
Medical Science
